Noisy Offering

Noisy offering was not collected last month. A good will offering of \$46.00 from the lunch after the annual meeting was donated to the Noisy offering fund.

NWLC COUNCIL MINUTES

The minutes from the council meetings are available for all to read. They are in a binder that is on the table in the gathering room. Any questions talk to one of your council members.

It was decided to find a fire alarm system for our church. Since the church is empty a lot, we felt that a system to alert the appropriate authorities is needed. Once a system is found to meet our needs, we will have to have a congregational meeting to vote on the funds needed.

ANNUAL MEETING HIGHLIGHTS

Greg Thomson has retired from his job of Deacon. Thank you for your many years of service. Penny Joecks was voted in to the position and accepted the job. Thank you, Penny.

All annual reports were read and approved. It was voted to accept the bid to restore the stained-glass windows. We enjoyed listening to Caleb from Cathedral Crafts in Winona explain the process and answer any questions. He informed us that if he had the go ahead soon the windows should be back and done by Easter, by Tuesday the windows were on their way to Winona.

2023 offering

If you have not received your tax statements contact Jacqie Senne. Vanco members can get their statements on their website.

The old wood trim that will be replaced and repainted by the restorer.

Up in the balcony gothic window that can be opened. They will be functional after the restoration.

One of the windows with the rolled plate glass. A storm window of old.

“**Rolled plate** is a type of industrially produced [glass](#). It was invented and patented by [James Hartley](#) circa 1847. Rolled plate is used [architecturally](#); for example, in the mid-19th century uses for rolled plate glass included roofing railway stations and greenhouses.”

There they go with our Blessings. The stained-glass windows are going to Cathedral Crafts in Winona, Minn. The representative has told us they should be back in our church for Easter. Roy Srp and Ryan Miller have worked closely with them, so if you have any questions don't hesitate to ask them.

Vent used to let in fresh air before air conditioners. The cloudy glass is rolled glass from the 1800's probably made in New York.

The Vents will be removed, on the windows in the nave.
